

# ***Project Management***

## ***18ME653(PE)/18ME761-OE***

***Staff Name: Geetanjali S Guggari.***

***Department of Mechanical Engineering***

## **Books**

1. S Choudhary, “Project Management” Tata McGraw Hill Education Private Limited New Delhi.

2001

2. Harold Kerzner, “Project Management: A Systems Approach To Planning, Scheduling And Controlling ”, CBS publisher and distributors

3. L S Srinath “ PERT and CPM Principles and Applications” Third Eddition

4. Dr. P N Modi “PERT and CPM”

## **Course learning objectives**

1. Understand Basic concepts of project management and project life cycle.
2. Understand method of project preparation and cost estimation.
3. Apply the appropriate project management tools and techniques.
4. Understand Project coordination and control

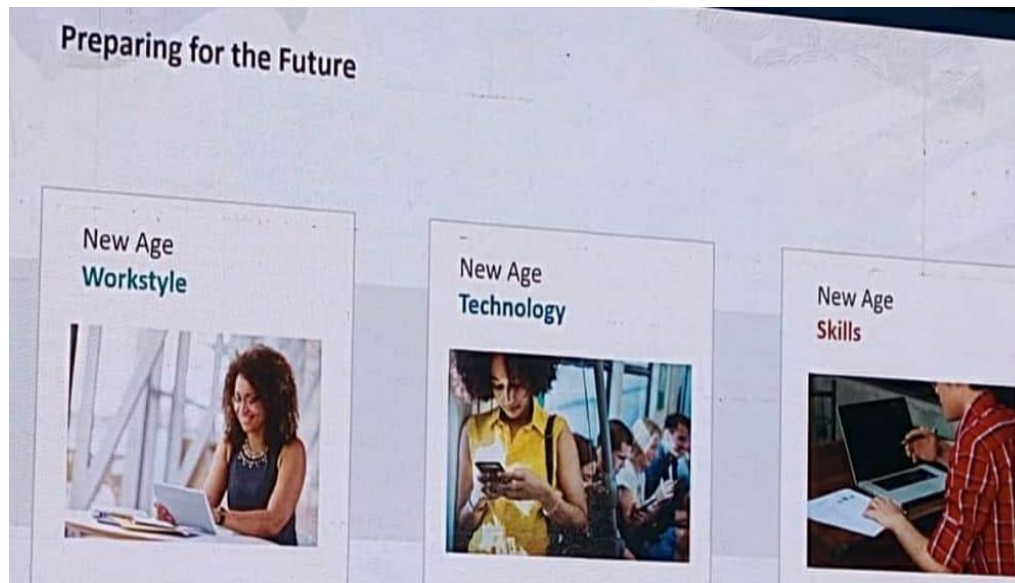

## Five Key Skills Required for Industry 4.0

- Digital Skills
- Technology and computer skill
- Programming Skills for Robots and automation
- Critical Thinking
- Working with tools and techniques

Deloitte: Growth Engine Machinery Sector Four scenarios for a successful future in 2030

- With 88 million project-oriented roles to be filled by 2027— that's 2.2 million project manager roles every year, it's just the right time to skill up in project management

# MANAGEMENT

Manage - Men – T

## Syllabus

### **Unit – I**

Concepts of project management

### **Unit – II**

Project planning and estimating:

### **Unit – III**

Organizing and staffing the project team

### **Unit – IV**

Project scheduling

### **Unit – V**

Project Co-ordination and control

# Project

Several Economists & Bankers have defined a Project in different ways. Let us also examine a few other definitions of **“Project.”**

- Project is an approval for a capital investment to develop facilities to provide Goods & Services.  
-- **World Bank**
- Project is non-repetitive, one – off undertaking normally with discrete times, financial and technical performance goals. – **Harrison**

- A Project typically has distant mission that it is designated to achieve and clear termination point, the achievement of the mission. – **Newman, Summer**
- A Project is a whole complex of activities involved in using resources to gain benefits. -- **Gillinger**
- A Project can be defined as a Scientifically evolved work plan devised to achieve a specific objective within a specified period of time --- **Vasanth Desai**

# Project Management

Figure 1-2. Overview of project management.

- The project management is designed to manage or control the company resources on given activity within time, within cost, and performance.
- Time , cost and performance are the constraints on project.

## **Books**

**1. S Choudhary, “Project Management” Tata McGraw Hill Education Private Limited New Delhi.**

**2001**

**2. Harold Kerzner, “Project Management: A Systems Approach To Planning, Scheduling And Controlling”, CBS publisher and distributors**

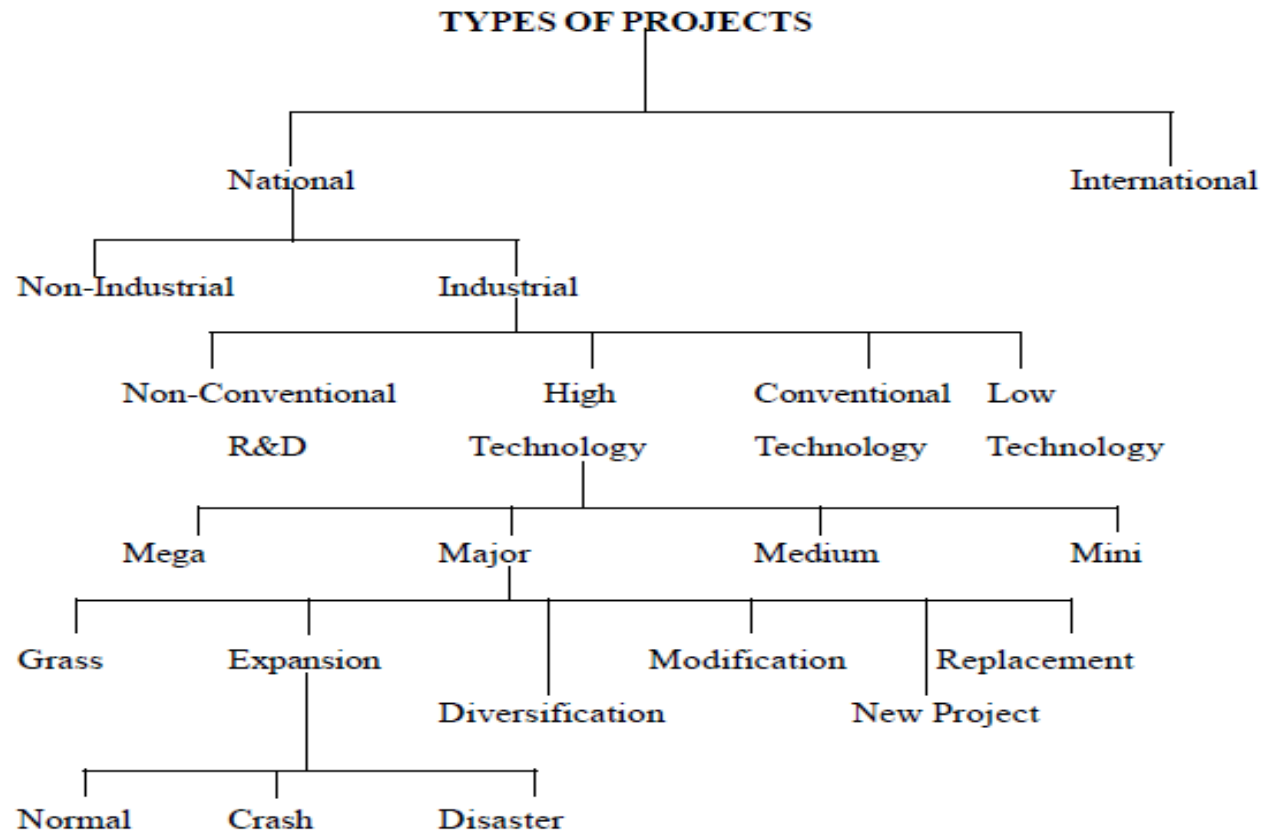

3. L S Srinath “ PERT and CPM Principles and Applications” Third Eddition

4. Dr. P N Modi “PERT and CPM”

**Unit 1:** Concepts of project,  
Categories of projects,  
Characteristics of project  
Phases of project life cycle,  
Roles and responsibilities of project leader,  
Tools and Techniques of project management

**Self leering topic: Project management as profession**

# Categories of projects

**Fig. 1.2 Classification of Project**

Make in India  
Health cards  
Swachh Bhart  
Smart City  
Pradhan Mantri gram sadak yogana  
Skill India  
Project farmers  
Demonetization in India  
National mission of clean Ganga  
Project Tiger  
Digital India  
Web development projects  
4G to 5G  
Land records digitization  
Digital universities  
Skill India  
Metro

Next Gen students are more focused on "innovating new ways with simple to adopt approach" and are contributing to this global mission.

Karnataka has signed a Rs. 23,000 crore MoU to set up India's first semiconductor fab! 🎉🎉

On April 28, 2022, the Border Roads Organisation (BRO) Engineering Marvel Atal Tunnel in Rohtang, Himachal Pradesh, got the Indian Building Congress (IBC) 'Best Infrastructure Project' award in New Delhi.

## ***Characteristics of a Project :***

1. Objectives
2. Life span
3. Single entity
4. Team work
- 5. Life cycle – growth – maturity – decay.**
6. Uniqueness
7. Change
8. Successive principle
9. Made to order
10. Unity in diversity
11. High level of sub-contracting
12. Risk and uncertainty

## **Project Life Cycle Phases :**

All projects have to pass through following phases:

1. Conception Phase
  2. Definition Phase
  3. Planning and organizing
  4. Implementation
  5. Project clean-up
- 

## 1. Conception phase :

- Project idea germinates
- One is seriously trying to overcome certain problems.
- Problems are non utilization of funds, plant capacity, expertise
- One is seized with problems he starts looking around to find out solution.
- The idea may suddenly come to his mind

Whatever may be the source the idea need to be put in black and white.

## 2. Definition Phase

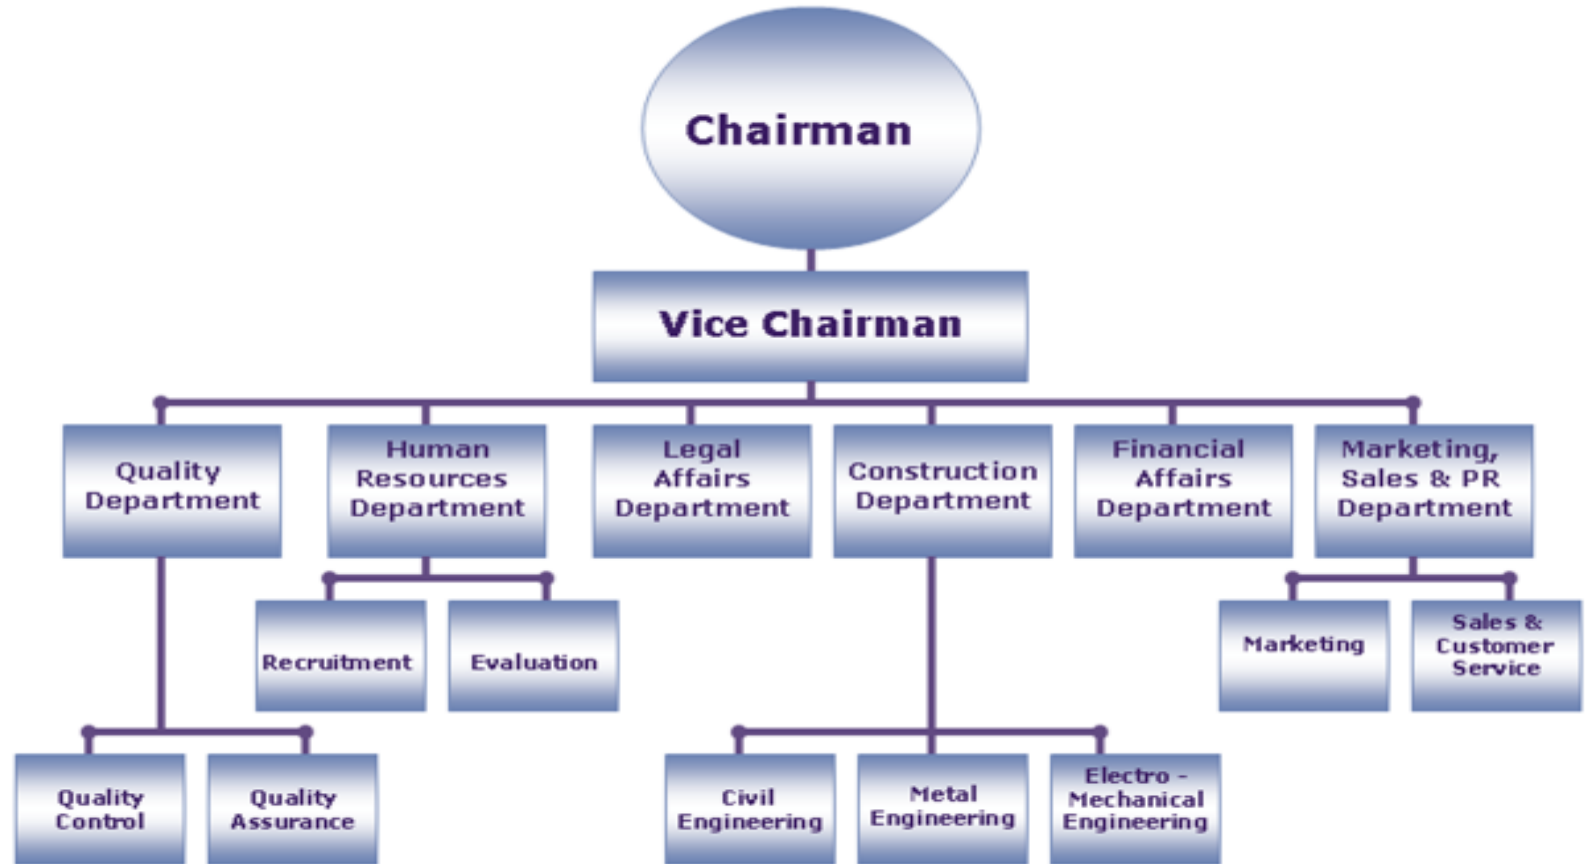

The areas to be examined during definition phase for **cement plant** are

- 1.Raw materials
- 2.Plant size/capacity
- 3.Location and site
- 4.Technology or process selection
- 5.Project layout
6. Plant and machinery
7. Electrical and instrumentation works
- 8.Civil engg. works
9. Utilities – Fuel ,power, and water
10. Manpower and organizational pattern
11. Financial analysis

### **3. Planning and organizing.**

This phase starts with Preparation of Project Execution plan

1. Project infrastructure
2. System design and basic engineering package
3. Organisation and manpower
4. Schedules and budgets
5. Licencing and government clearances
6. Finance
7. Systems and procedures
8. Identification of project manager
9. Design basis and general conditions for purchase and contracts
10. Site preparation and investigations
11. Construction resource and and materials
12. Work packing

## 4. Implementation phase

80 -85 % work is completed

This period is hectic activity of project

SUB PHASE NO	SUB-PHASE DESCRIPTION	MONTHS											
		1	2	3	4	5	6	7	8	9	10	11	12
I	DETAILED ENGINEERING												
II	ORDERING												
III	DELIVERY												
IV	CONSTRUCTION & ERECTION												
V	START-UP												

FIG. 1.3 Sub-phases of project implementation for an engineering project

## **5. Project clean-up**

1. Planning of staff and execution of project
2. Project accounts are closed
3. Design engineers are posted on field

# Project life cycle curve

## **Improving Capability with Project Management Certifications: Telstra's Story**

Telstra has approximately 33,000 employees in over 20 countries and offers a wide range of services around the globe, with a focus on the Asia-Pacific region.

[telstra.com.au](http://telstra.com.au).

- 3.2 billion people, almost half the globe's population, use the internet, according to and from International Telecommunication Union

# Vision of Telstra

- “Our vision of becoming a world-class technology company won’t be achieved without world- class project management. It’s central to the way we work, and fundamental to our ability to deliver a brilliant, connected future for our customers.”  
Andrew Penn, CEO, Telstra

- That’s why its **strategic goal is to create a brilliant, connected future for everyone.**
- Project Management Institute (PMI)
- It frameworks, standards, and certifications to cultivate talent, standardize qualifications across its Global Services Practices (GSP) division, and support career paths for its project managers.

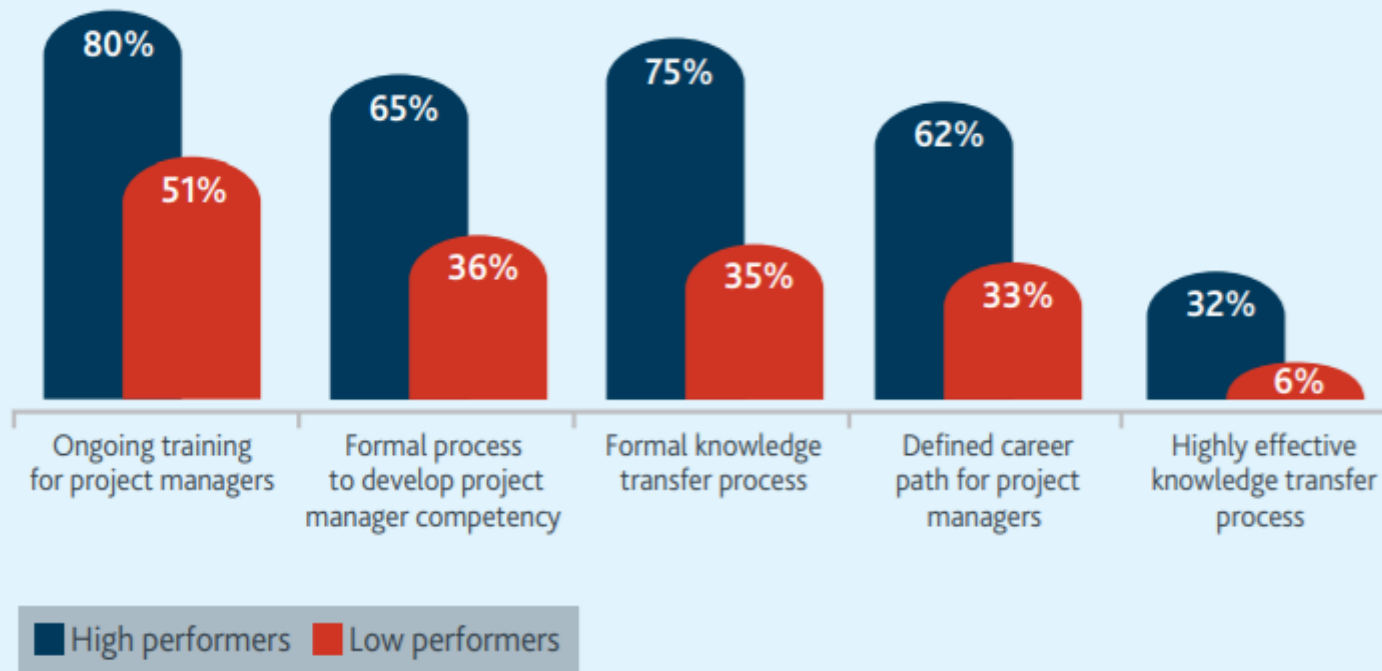

# Focusing on Customer Delivery

- The GSP ( Global Service practice )division, which is overseen by Telstra's Global Project Management Services .
- Delivers high- end technology consulting, design, and deployment across all of Telstra's technology offerings.
- Established in 2013, GSP's major product portfolios include network services, communications and collaboration technologies, and security and cloud services.
- only in two years, the number of employees grew to more than 1,500. Every day, GSP manages an average of 2,000 unique customers
- which range from “everyday” projects to multi-million dollar transition and transformation projects.

## High-Performing Organizations Focus on Talent Management

PMI's *Pulse of the Profession*®: *Capturing the Value of Project Management* report indicates that high-performing organizations are significantly more likely to focus on talent management, on establishing ongoing training, and on formal and effective knowledge transfer.

In fact, that research shows that 80 percent of high-performing organizations had ongoing training for project managers, 65 percent had a formal process in place to develop project manager competency, and 62 percent had defined career paths for their project managers.

# The Need for Strategy

- Careful development and management of project managers can contribute greatly to an organization's success
- Telstra needed a certification model that would provide confidence for its customers and ensure that projects would be delivered in a consistent, reliable, world-class manner.
- **Telstra was establish a formal certification program for its project management community.**

# A Corporate-Wide Initiative

- In mid-2015, Telstra launched a program to certify **more than 400** of GSP's project managers through PMI's globally recognized certifications.
- Now, Telstra has a model that can be scaled domestically and globally.

# NPTEL courses

- 1) Project Management for Managers
- 2) Project Management
- 3) Software project management etc

- **NPTEL** was initiated in 2003 by seven IITs (Bombay, Delhi, Kanpur, Kharagpur, Madras, Guwahati and Roorkee) along with the Indian Institute of Science (IISc), Bengaluru
- In its first phase (2003-2009), **NPTEL** developed 235 courses in web/video format, at <http://nptel.iitm.ac.in> (now defunct).

# Solar Park

India's first solar park at Charanka village in Gujarat then

Dhirubhai Ambani Solar Park near Pokran in the Jaisalmer are two major solar power projects in India.

Gujarat Solar Park known as Charanka Solar Park is Asia's largest solar park hub.

# Case study

- Mukesh Ambani sets out to change the face of Indian cities, first project already on
  - For study

## **1.10 TOOLS AND TECHNIQUES FOR PROJECT MANAGEMENT**

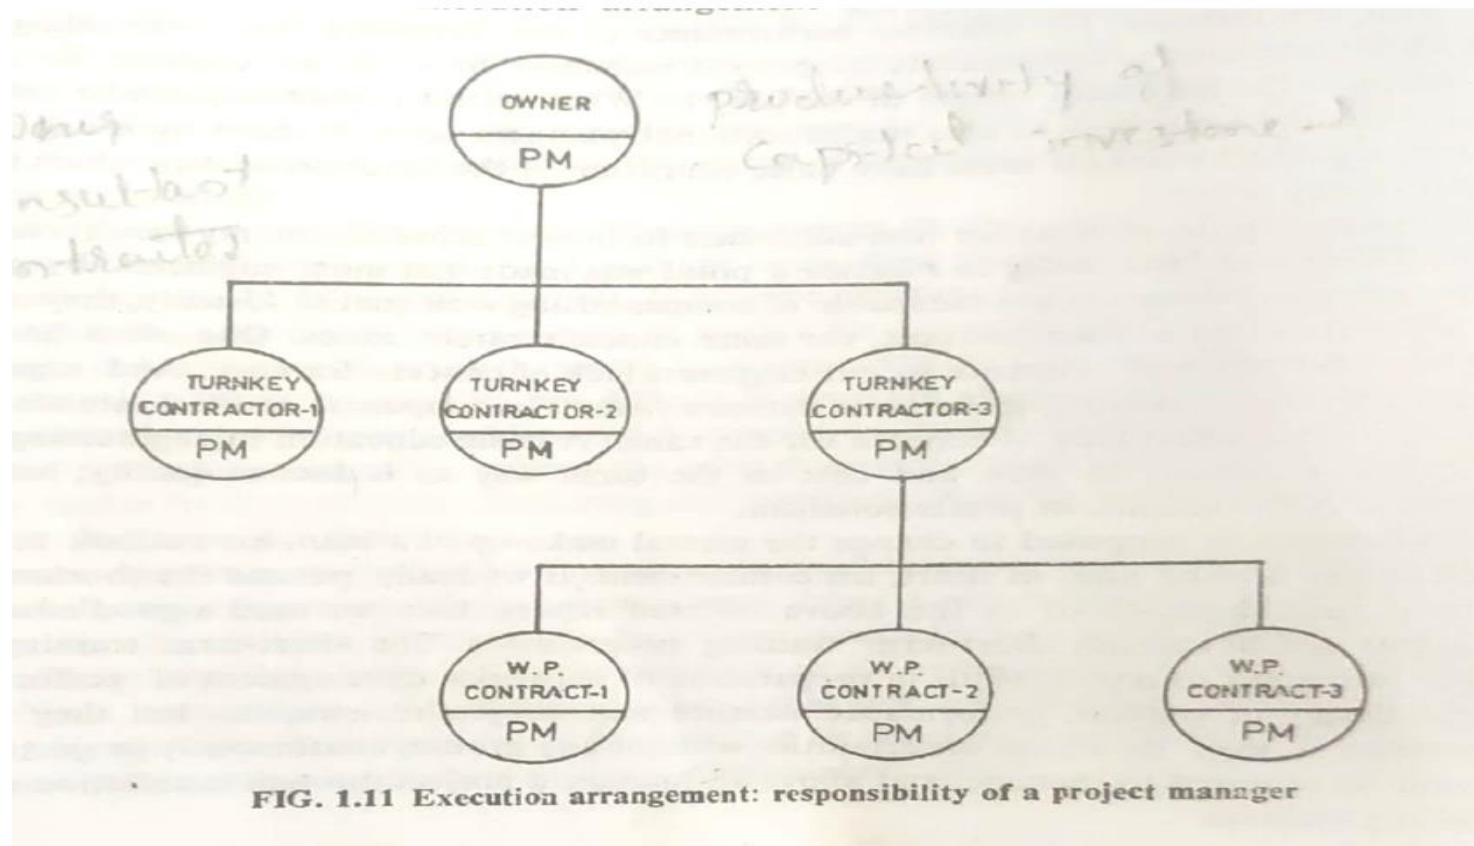

There are several tools and techniques which would contribute significantly towards effective project management these can be broadly grouped under the following heads :

- 1. Project selection techniques**
  - (a) Cost benefit analysis and
  - (b) Risk and sensitivity analysis
- 2. Project execution planning techniques**
  - (a) Work breakdown structure (WBS)
  - (b) project execution plan (PEP)
  - (c) Project responsibility matrix and
  - (d) Project management manual
- 3. Project scheduling and coordinating techniques**
  - (a) Bar charts
  - (b) Life cycle curves
  - (c) Line of balance (LOB) and
  - (d) Networking techniques (PERT/CPM)
- 4. Project monitoring and progressing techniques**
  - (a) Progress measurement technique (PROMPT)
  - (b) Performance monitoring technique (PERMIT) and
  - (c) Updating, reviewing and reporting technique (URT)
- 5. Project cost and productivity control techniques**
  - (a) Productivity budgeting techniques
  - (b) Value engineering (VE) and

# Tools and Techniques of project Management

- 6. **Project communication and clean-up techniques**
  - (a) Control room and
  - (b) Computerised information systems

# Roles and Responsibilities of project Manager

# Roles and Responsibilities of project Manager(

General management capabilities)

- 1 Defining and maintaining the integrity of a project;
- 2 Development of project execution plan;
- 3 Organization for execution of the plan;
- 4 Setting of targets and development of systems and procedures for accomplishment of project objectives and targets;
- 5 Negotiation for commitments;
- 6 Direction, coordination and control of project activities;
- 7 Contract management;
- 8 Non-human resource management including fiscal matters;
- 9 Problem-solving;

# Roles and Responsibilities of project Manager

- 10 Man management;
- 11 Satisfaction of customer, Government and the public; and
- 12 Achievement of project objectives, cash surplus and higher productivity.
